

Cancun – One of Mexico’s Top Ten Winter Vacations

Once it starts turning cold where you live, people start to think of a get-away to a warmer climate. Nothing fits the bill as good as Cancun, the Mexican pleasure spot that offers warm weather, white sand beaches, fantastic water activities and lots of sites to see. It’s been named one of the top ten winter vacations.

Cancun is proud to be Mexico’s top tourist destination; the locals have worked hard to create the perfect beach getaway to enjoy any time of the year, but especially when it gets cooler up north.

Cancun has a lot in common with the Outer Banks and Daytona Beach. In all three instances there is the mainland, then another body of water, either a river or a coastal waterway or a lagoon, and then the island or spit of land on the ocean side, Atlantic for two of them and in Cancun’s case, The Caribbean.

In Cancun it’s an island that is fourteen miles long and it’s where most of the hotels are and where tourists spend days sunning. The lagoon that separates the island (not a true island because at both the north and south ends are roads crossing over to the mainland) from the mainland is ideal for lots of water sports. It’s a perfect tropical setting with 21st century amenities.

The mainland is where most of the locals live, and it’s where you will experience a truer sense of the original Cancun. Street vendors and outdoor café’s instead of malls and air-conditioned restaurants are on the mainland, and your wallet will be happier too as your money will stretch a lot further here than on the island.
